## WORK EXPERIENCE

---

### ION Group [↗](#)

Noida

Software Developer

January 2023 - Current

- **Developed** production environment's statistics collection automation projects from scratch using **AWS**. Created a robust and scalable architecture, resulting in savings of over **\$100K** for my firm by eliminating manual processes.
- **Building** a custom accounting product for a tier one bank that processes over **10 million** accounting requests in a short span of time.
- **Took initiative** and reported flaws in the current product release cycle, escalated the issue and later worked on it to resolve them.
- **Implemented** a complete CI/CD pipeline, eliminating manual intervention and decreasing deployment effort by **90%**
- Led bug-fixing efforts, resolving issues promptly to ensure smooth functionality of the product.

### CoreDevs

Remote

Founder and Lead Developer

March 2021 - December 2022

- **Managed** a team of developers, delivering high-quality projects for international clients and ensuring timely completion.
- **Built** responsive websites using MERN stack and Bootstrap, enhancing user experience across various devices.
- Understand client needs, communicate deliverables clearly to the development teams and effectively marketed our services.

### BlogBay

Remote

Founder

February 2022 - May 2022

- A B2B subscription based content writing service to cater to our clients with expertise in SEO content.

## PROJECTS

---

**DSAbot (A bot based automation application)** ([link](#)) (User base 1000+) Sends most asked DSA questions from top tech companies each day on the user's Discord server. Tech Stack : Discordjs, Nodejs, Express, MongoDB (January 2022)
